ABOUT ME

I have been programming since year 2016, using the knowledge of project management with my programming skills to solve problems. The first problem I solve was an e-commerce project assigned to me alone. With passion for programming and problem solving with relentless research, I was able to develop the application with Laravel PHP web framework. In this application, I used best code practices including code splitting and high modularization; web security with modern authentication technique as well as modern deployment technique. The application was developed locally on docker.
Alongside with that, I have worked with friend to develop school management application which I coded from scratch with PHP backend engine, Apache web server, HTML CSS and Javascript at frontend and MYSQL database engine which I connect to using PDO.
Because of high rate of data generation, there is need for all programmer to learn how to handle Big Data, for this reason, I have been doing a lot of research on Node JS Mongo DB application development and some apps have been push to git repository for while practicing.
My real strength is the ability to understand what primary stack holders really want alongside with a well document and structured project profile.
This project profile enable me to apply work breakdown analysis to identify every bit part of the project so that appropriate project timeline will be met

WORK EXPERIENCED

BONJOUREX RESOURCES NIGERIA LTD. Full Stack Developer

2018– till now

Key Responsibilities

- Developing, deploying and managing the company entire web application.
- Deploying and management of web server both on cloud and webhosting platforms.
- Managing the web server and ensuring it security.
- Update the VM software to scale up or down base on traffic demand.
- Database creation and management.
- Web application version control using GitHub.
- Developing learning management system with roles and permission level.

Phylum Advance Learning Center Academic Tutor

2016 – 2018.

Key responsibilities

- Teaching, accessing and monitoring the student performance
- I conducted experiments in the lab
- Creating bench marks and grading student examinations

I improved the student's thinking ability and helped in tutoring the students to gain admission into various higher institutions. While working here, there was an introduction of virtual learning system in the school which ignited my interest in virtualization.

Ibadan Grammar School Academic Tutor

2015 – 2016

Role:

Key responsibilities

- I taught Mathematics, Physics and Chemistry to senior secondary School students.
- I also tutored the UTME and A 'Level students.

Obafemi Awolowo University (OAU) Research Assistance

2014 – 2015

Key responsibilities

- Experience with spectroscopic techniques.
- Complement data streams with cellular functional assays.
- Lead and interact with cross-functional scientific teams.
- Present research activities at internal and external meetings.

I acted as a research assistance and in enzymology lab conducting experiment and writing report on enzyme extraction, purification and activity where I use a lot of programmed machines to collect, organize and analyze data. I Discovered dye *decolorization* of Laccase extracted from fungi *Cladosporium werneckii*

SKILLS

MYSQL	Virtualization	Active Directory	GitHub	Node js	Kubernetes	Docker
PHP	JavaScrip	JQuery	HTML	CSS	react	MongoDB
Networking	Web security and Computing	Data analysis(R)	Problem solving	Code debugging	Teaching	Researching
Communicating	Power BI	R				

CERTIFICATION

- Assessment EPFL (ÉCOLE POLYTECHNIQUE FÉDÉRALE DE LAUSANNE) - Smart Cities: Management of Smart Urban Infrastructures
- Upstart University Farm Training Course: Social Media Marketing for Farmer
- Upstart University Farm Training Course: Lighting for Upstart Farmers
- Upstart University Farm Training Course: Aquaponic DWC
